SKILLS

Programming

- Java
- Spring Boot
- ReactJs
- NodeJs

Software & Tools

MySQL | MongoDB Atlas | AWS | Firebase

Languages

English (Professional Working Proficiency)
Hindi (Full Professional Proficiency)

CERTIFICATES

- **AWS Cloud Learning**
- **IBM Skillsbuild Learning Completion**
- **NxtWave Certificate**

ACHIEVEMENTS

- Achieved **All India Rank (AIR) 2540** with an aggregate marks of 56.38 and **Gate Score of 627** in **GATE CSE 2025**
- Got Appreciation Letter from **RCB** for completing first week in **Code to Win Challenge**

EDUCATION

Masters in Computer Science Engineering

Visvesvaraya National Institute of Technology (VNIT)

2025-Present
Nagpur, Maharashtra
- CGPA: 8.17 (*till 1st Sem)

Bachelors in Electrical Engineering

Chandigarh University (CU)

2021-2025
Chandigarh, Punjab
- CGPA: 8.2

12th Standard

Mansarovar Public School

2020-2021
Bhopal, Madhya Pradesh
- Percentage: 89%

PROJECTS

Medishield: Health Guardian – Healthcare Web Platform

In Progress

- Developing a full-stack healthcare platform using **Spring Boot 3** and **React**, designing **RESTful APIs** to manage structured patient and health record workflows.
- Implementing JWT-based authentication with **Spring Security** and integrating **ImageKit** with file-size validation for secure handling of user profile and medical images.

ConnectLearn: E-Learning Website

- Developed a full-stack platform using the MERN stack, integrating **AWS Cognito** for enterprise-grade user authentication and data privacy.
- Leveraged **AWS Amplify** for seamless deployment and managed dynamic database integration for real-time course and user data management.

QuickChat: Chat Application

- Engineered a real-time communication engine using **Socket.io** and **WebSockets** to enable low-latency, bi-directional data transfer.
- Optimized user experience with a responsive **Tailwind CSS** interface, secured via **Firebase Authentication** for robust identity management.

JARVIS: Voice Assistant using Java

- Built a desktop assistant using **Sphinx4 (STT)** and **FreeTTS (TTS)**, implementing custom **JSGF grammars** for high-accuracy voice recognition.
- Developed an event-driven system for executing OS level tasks and custom wake-word detection to enhance human-computer interaction.
